

SCHMIDT

SNOW CUTTE

SCHMIDT

Snow cutter Type VF 3-Z

for Unimog 406

This unit does not have a separate driving engine but is driven by the rear p. t. o. shaft of the Unimog via a two-stage change-speed gear, ensuring most economical use of the available p. t. o. capacity. Identical characteristics as shown by the snow cutter types VF1 and VF 3, but necessarily somewhat lower clearing output. Clearing implement can be removed in minutes, permitting intermittent operation of snow cutter and snow ploughs. Corresponding snow cutter type VF1-Z available for Unimog type 421.

VF 3-Z: Clearing width 8'2,45 m. Height of unit 4ft/1,30 m, drive: p.t.o. shaft.

VF 1-Z: Clearing width 7'3"/2,20 m. Height of unit 4ft/1,30 m drive: p.t.o. shaft.
