**COBUS® 2400**

*A spacious and extravagant interior offers a pleasant and enjoyable atmosphere.*

*Excellent overall visibility designed driver's compartment ensures safety and comfort during operation.*

*Technical revolution for this size of bus: vast low floor standing area with most comfortable access through the 1-step exit.*

Compact from the outside but spacious inside, the COBUS 2400 is the ideal bus for VIP- First and Business Class passengers as well as for crew or "last minute passenger" transportation. Along traditional COBUS lines, the COBUS 2400 is mounted on a Mercedes Benz chassis and manufactured in series production – synonyms for a world-wide service network and state-of-the-art technology. The engine-gearbox-drive combination provides sufficient power at the lowest fuel consumption alike. Conformity to Euro II exhaust emission regulations is standard.

*and an ergonomically  
ent provide maximum  
l apron operations.*

*A pneumatic suspension system lowers  
the bus body for convenient embarking  
and disembarking.*

*COBUS 2400 - the most economic way of servicing  
commuter aircraft!*

The automatic transmission offers safe driving and easy handling while the pneumatic suspension system gives passengers a smooth and comfortable ride. The all-aluminum body is entirely corrosion resistant and designed for easy replacement of damaged body parts ("Co-Bolt" patent), its low weight permits a large number of passengers and luggage. Two passengers at a time can get on or off the bus, the door width of 1.260 mm and entrance of 270-290 mm, thus speeding up the passenger handling process for waiting aircraft with the COBUS 2400.
